Prompts used

1. Project Documentation - chatGPT

"Analyze my AI-powered project and prepare complete technical documentation covering objective, system architecture, modules, algorithms, implementation, testing, results, limitations, and future scope".

2. Literature Review - Scispace

"Conduct a literature review on AI-based personalized learning, adaptive question difficulty, learning analytics, pre-test/post-test evaluation. Summarise existing methods, research gaps, limitations."

3. Reference Collection - Consensus AI.

"Find relevant academic research papers on Genetic Motif finder, learning analytics, provide authentic citations, publication details and DOI links where available."

14. IEEE Paper formatting - Overleaf.

"Format my research paper using the official IEEE conference LaTeX Template. Ensure correct author details, two-column layout, headings, equations, figures, tables, citations and references".

Tools used:

ChatGPT - documentation, architecture, evaluation and review

Scispace - literature review,

Consensus AI - research references;

overleaf - IEEE paper writing and formatting.
